

## ANDREW FERNANDES SBARBARO

[a@arfs.co](mailto:a@arfs.co)

### Career Skill Highlights

- **Technical Troubleshooting & MacOS Administration:** Primary escalation for critical issues across Windows and Mac environments; oversee Kandji for 500+ devices, achieving full automation.
- **Infrastructure & DevOps:** Implement CI/CD pipelines and manage AWS/GCP environments for scalability and efficiency.
- **AI & Automation:** Built an AI chatbot and self-service tools, boosting IT support efficiency for 2,000+ users.
- **IT Inventory Management:** Led Trelica integrations, enhancing asset management and workflow optimization.
- **Client Support & Team Leadership:** Delivered white-glove service to executives and traders; led cross-functional projects and mentored team members.

### Relevant Work Experience

#### **Systems Engineer, PEAK6 Capital Management**

06/2025 - present

Hybrid - Downtown Chicago, Illinois

#### **Senior Desktop Support Analyst, PEAK6 Capital Management**

07/2024 - 06/2025

Hybrid - Downtown Chicago, Illinois

- Designed and developed a custom in-house inventory management system, integrating Kandji, Trelica, ConnectWise, Lansweeper, and Zendesk into a unified platform. Built with React, Express, and TypeScript, the system enables seamless management of Mac and Windows attributes from a single interface and is securely hosted on AWS.
- Led a large-scale Windows and Linux server decommissioning initiative, overseeing the assessment, upgrade, and retirement of over 200+ virtual and bare-metal servers. This project involved decommissioning mission-critical production trading and development servers, ensuring minimal disruption and optimizing infrastructure efficiency.
- Act as the primary Mac administrator, overseeing the entire Kandji environment, with responsibility for over 500+ devices.
- Achieved a major milestone by fully automating the management of Macs, significantly reducing manual intervention.
- Implemented CI/CD methodologies for system configurations, streamlining the deployment process across managed devices.
- Led the migration of the firm's entire device fleet from classic blueprints to assignment maps, greatly enhancing efficiency and precision in device management.
- Serve as the primary escalation point for root cause analysis across both Windows and Mac environments, ensuring swift and effective resolution of critical technical issues.
- Provide premium, white-glove service to C-Suite executives and critical support for traders, swiftly handling complex technical challenges.
- Lead integrations for the IT inventory management platform, Trelica, enhancing asset tracking and optimizing inventory workflows.

#### **Software & DevOps Engineer, PEAK6 Labs & Applied Ai**

05/2022 - 07/2024

Hybrid - Downtown Chicago, Illinois

- Part of a handpicked agile team reporting directly to the founders, tasked with developing innovative fintech and AI-driven solutions.
- Engineered state-of-the-art applications using a diverse tech stack, including Java, JavaScript, TypeScript, Python, Go, React, and Bash.
- Built and maintained an AI chatbot ("Coach Z & R2G2") for Slack, developing the backend and frontend architecture, admin portal, and user interfaces, which enhanced support accessibility for over 2,000 internal users.
- Developed a web GUI to facilitate self-service, store access, and support functions, streamlining interaction between users and IT resources.

- Created automated CI/CD pipelines with Terraform, Pulumi, and GitHub Actions, significantly enhancing deployment speed and reliability.
- Spearheaded the integration of large language models (OpenAI, Claude, Perplexity, Gemini) to drive AI innovation, improving internal efficiency and user experience.
- Built and maintained the infrastructure to support multiple active internal applications, managing AWS and GCP environments to ensure seamless operation across platforms like EC2, ECS, S3, Cloud Run, and Alloy DB.
- Proactively collaborated with software engineering teams to enhance testing protocols and improve overall productivity through automation and workflow improvements.

### **PEAK6 Services - Desktop Support Analyst**

06/2021 - 05/2022

Onsite - Downtown Chicago, Illinois

Employed as a Contractor with TEKSystems 06/2021 - 08/2021

- Delivered support across a diverse portfolio, including Apex Fintech Solutions, Evil Geniuses, Poker Power, and others, ensuring tailored IT solutions and high-quality service.
- Played a pivotal role in refining IT processes for onboarding, offboarding, mergers, and acquisitions.
- Collaborated with Cloud and Systems teams to enhance and automate IT support processes, resulting in improved user satisfaction and operational efficiency.
- Created detailed documentation for IT procedures and user support, standardizing practices across multiple organizations.
- Administered daily system support for critical IT infrastructure and software including Duo, Okta SSO, Cisco AnyConnect, Netskope, Active Directory, Google Workspace, SCCM, Smart Deploy, Office 365, CUCM, Lansweeper, Zendesk, Jamf, Apple Business Manager, VMware, and Automox.
